Consignment Report

- The outgoing consignment report and the bulk export consignment report are being combined into a single report called the Consignments Report.
- The Consignment Report has the ability to create document templates similar to the stock report.
- The outgoing consignment email (now called the consignment report email) can now be customised to choose which reports go out. These are chosen from save document templates.
- New option on how to display adhoc charges on the picking screen.
- Various bug fixes and improvements.
