

Amazon Integration

CartonCloud is integrated with Amazon Seller Central allowing orders created in Amazon Seller Central to automatically flow into CartonCloud as Sale Orders.

What does the integration allow?

Pulling Sale Orders from Amazon Seller Central into CartonCloud

This is a one-way integration in which a new order in Amazon Seller Central creates a new Sale Order within CartonCloud. It transfers the delivery address, reference, and all of the ordered items.

The integration is designed to be flexible with the option to include some additional custom fields that can be pushed through from Amazon Seller Central. Additionally, we can configure rules to control which orders within Amazon Seller Central should be transferred to CartonCloud (so not everything goes through and you have control over which are transferred).

Note: No information is pushed back to Amazon Seller Central from CartonCloud - however we're looking to add this in Q1/Q2 2019.

How to get connected

Connections to Amazon Seller Central need to be configured by the CartonCloud team.

This integration requires you to have:

- A Amazon Seller Central Account
- A Amazon Seller Central user for CartonCloud to use for pulling orders.

To get this setup, please contact your on-boarding consultant or [contact us](#).

Price

1. Set up Fee \$0.00
2. Ongoing Support Fee per week \$ 9.60 + GST (billed annually upfront)
