

Shippit Integration

CartonCloud is integrated with Shippit via their API allowing Sale Orders picked in the CartonCloud WMS to be automatically transferred into the Shippit shipping aggregator.

What does the integration allow?

Pushing Sale Orders from CartonCloud into Shippit

This is a one-way integration in which a CartonCloud Sale Order creates a shipment within Shippit. It transfers the delivery address, sales order items with the respective weights and creates the shipment record within Shippit

A screenshot of the Shippit web interface. The top navigation bar is blue and contains the Shippit logo, a search bar, and several menu items: "New Orders" with a red badge showing "8", "Ready to Ship", "Track", and "Send". Below the navigation bar is a section titled "Standard Orders". It includes a filter bar with "ALL", "PACKSLIP", "DELETE", and "CONFIRM" buttons, and a status "0 orders selected". There are also filter options for "All: Order Date", "All: Carrier", and "Errors", along with a "Reset Filter" link. Below the filter bar is a table of orders. The table has columns for "Order Placed", "Retailer Invoice", "Recipient", "Type", "kg", "L(cm)", "W(cm)", "H(cm)", "Insur.", "Courier", and "Quote". One order is visible: "01 Nov 05:33PM", "INV-09991", "Vincent", "Satchel 500g ATL (A5)", "kg", "L(cm)", "W(cm)", "H(cm)", "\$1000", "CP", "\$6.59". There is a "CONFIRM" button and a dropdown arrow for each order row.

You can then confirm the packaging to match with your preferred carrier and generate the labels from within Shippit.

This integration is designed to be flexible, with the option to include some additional custom fields that can be mapped to fields within Shippit. Additionally you have a choice of when the shipment is created for example once the order is packed or dispatched.

How to get connected

Connections to Shippit need to be configured by the CartonCloud team.

This integration requires you to have:

- A Shippit Account
- Your Shippit API Key

To get this setup, please contact your on-boarding consultant or [contact us](#).

Price

1. Set up Fee \$0.00
2. Ongoing Support Fee per week \$ 9.60 + GST (billed annually upfront)
